

## INVITATION TO THE INFORMATION-/FOUNDING EVENT

### INB/NK 208 «Blockchain and distributed ledger technologies»

The Blockchain technology is the next revolution in several fields of life, mainly in the financial sector but also in the sectors of insurance, logistic, healthcare system, pharmaceutical industry, manufacturing systems engineering and electricity, it will affect our way of life completely.

Ensuring that this emergent technology will be a benefit to consumers, industry and governments a transparent and open standardization process is required. Further, a wide stakeholder involvement in the international standardization is necessary to support innovation and reduce barriers to trade. Without international standards and supporting protocols the broad adoption and use of this technology will not be possible.

Ensuring that this emergent technology will be a benefit to consumers, industry and governments a transparent and open standardization process is required. Further, a wide stakeholder involvement in the international standardization is necessary to support innovation and reduce barriers to trade. Without international standards and supporting protocols the broad adoption and use of this technology will not be possible.

Last year the international technical committee ISO/TC 307 “Blockchain and distributed ledger technologies” was founded in Australia. Now, Switzerland is founding a national mirror committee to ensure the participation of the Swiss stakeholders in the international Blockchain standards developments. Therefore, we would like to invite you to the information-/founding event to the national standardization committee «Blockchain and distributed ledger technologies».

Date: **Tuesday, 28. November 2017 from 12.00 – 14.30**, Sandwiches for lunch will be provided

Room number: **LAC-E071**

Meeting Language: The event will be held in **English**

Registration: For participation, please register with an email to [melanie.hasler@snv.ch](mailto:melanie.hasler@snv.ch)

Directions to campus: [Pädagogische Hochschule Zürich Lagerstrasse 2, 8090 Zurich](#)
