

Why Sustainable Finance standards matter

Thursday 23 July, 11.00-12.30 UTC

With a global focus on designing a resilient and sustainable recovery from the CV-19 pandemic, future flows of finance are more active than ever in seeking ways to support sustainable outcomes. Entering its second year ISO's Technical Committee on Sustainable Finance ([ISO/TC 322](http://iso.org/iso-322)) has published its strategic plan to guide its future activity, is developing a framework standard and will publish shortly a glossary to aid common understanding. This is therefore an excellent time to learn more about the committee's work, and how to engage, influence and contribute to developing international standards in sustainable finance that will meet our expectations of the future.

The webinar is open to all stakeholders, including those in ISO national member bodies and existing or potential liaison organizations. All delegates must [register here](#).

WEBINAR PROGRAMME
